Practical Assignment-2

QUESTION:1

2 components using CDN approach.

← ↻ ⓘ File C:/18_Drashti_701_A2/question1/index.html

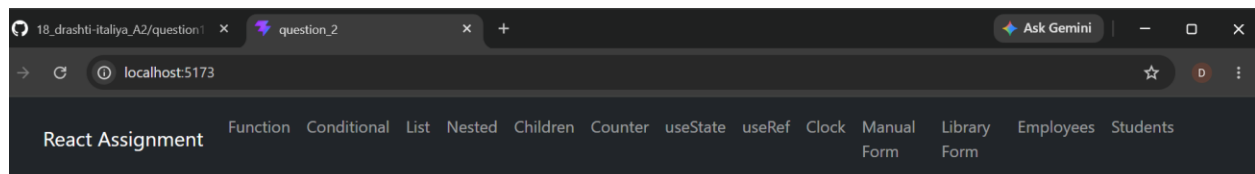

Hello

Drashti

QUESTION:2

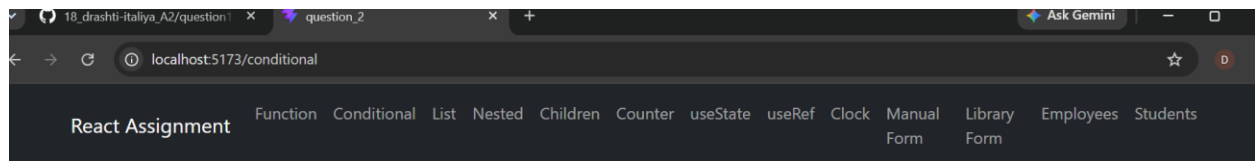

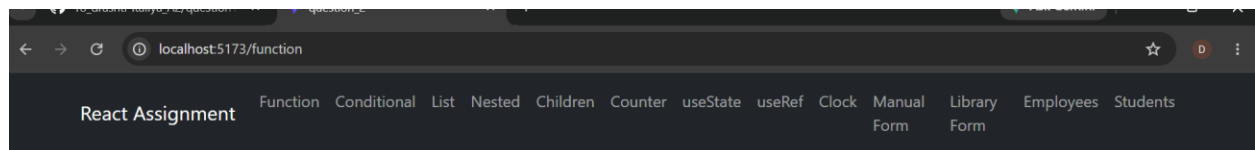

Create Vite/CRA based react app, add bootstrap to it, add router to it and give links for components with following requirements:

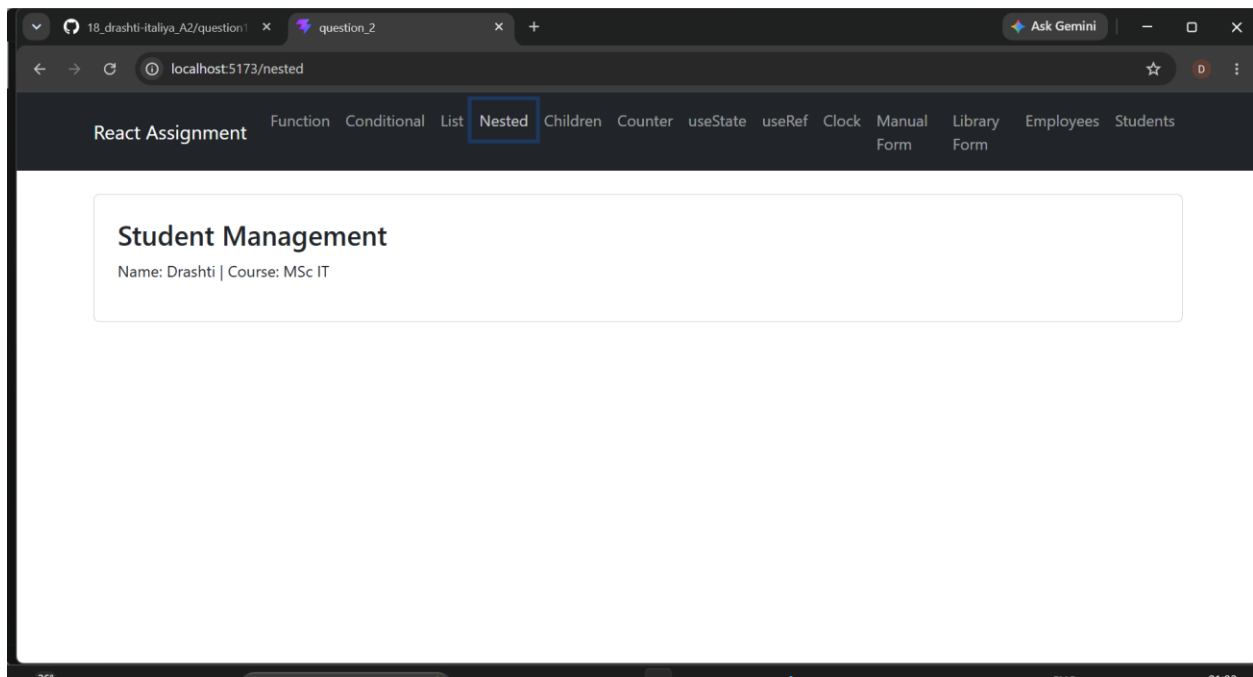

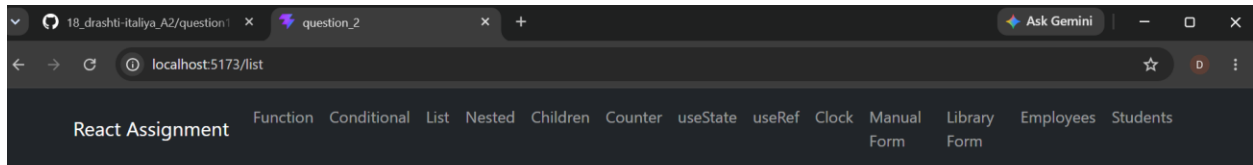

- 1) Create and display component using function component.
- 2) Take a suitable case and develop components for conditional rendering, list, nested components, children (containment)
- 3) Develop counter component with increment, decrement, reset.
- 4) Develop components using useState and useRef using function components.
- 5) Develop components for digital clock using useState and useEffect.
- 6) Develop component for live form validation with manual validation.
- 7) Develop component for live form validation with any third party validation library.
- 8) Develop component that fetches data from a employees.json JSON file and display in a table.
- 9) Develop component to fetch data from students.json and display. Add search and filtering. Search should be based on student firstname and filtering is based on semester, div, gender etc.

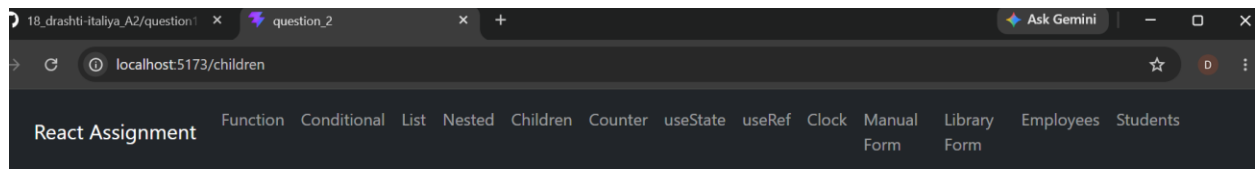

React Assignment

Select a component from the navigation menu.

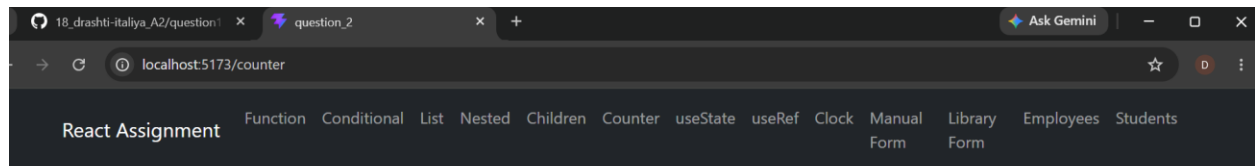

Children / Containment

This content is passed from the parent using children.

Click Me

Counter

7

Increment

Decrement

Reset

useState Example

Hello DRASHTI

useRef Example

Focus Input

question_2

Ask Gemini

Verify it's you

localhost:5173/clock

React Assignment

Function Conditional List Nested Children Counter useState useRef Clock Manual Form Library Form Employees Students

Digital Clock

7:45:25 PM
